Liberty Communications Named Certified Gig-Capable Provider by NTCA–The Rural Broadband Association

Arlington, Va., September 7, 2018 – Liberty Communications was today recognized by NTCA–The Rural Broadband Association, the premier association representing nearly 900 independent, community-based telecommunications companies that are leading innovation in rural and small-town America, as a Certified Gig-Capable Provider for delivering gigabit broadband speeds and enabling technological innovation in the West Branch and West Liberty communities.

As a Certified Gig-Capable Provider, Liberty Communications joins a national campaign to build awareness and industry recognition of community-based telecom providers that have built communications networks capable of delivering Internet speeds of up to 1 gigabit per second, which is 100 times faster than those currently available in many U.S. households.

“I applaud Liberty Communications for its commitment to delivering the Internet’s fastest speeds—an accomplishment worthy of much praise considering the unique and challenging circumstances small, community-based telecommunications providers operate under every day in serving some of our country’s most rural and remote communities,” said NTCA Chief Executive Officer Shirley Bloomfield. “By building a gigabit-capable network, Liberty Communications has not only overcome these challenges, but also shattered conventional benchmarks for broadband speed to enable cutting-edge technologies that drive innovation and promote economic development in their communities, region and nationwide.”

Liberty Communications first launched Gigabit Internet speeds on December 25, 2015. To achieve certification, telecommunications companies must show that gigabit technology is currently commercially available within 95% of one or more exchanges within its serving territory and that such service can be provided without new trenching or stringing new aerial facilities. This statement must be confirmed by a letter from an engineering firm or other independent source involved in the company’s network planning, deployment or operation.

More information about the NTCA Gig-Capable Provider certification program is available at www.ntca.org/gigcertified.

###

About Liberty Communications

Liberty Communications is a telecommunications company located in West Branch and West Liberty, Iowa. For over 100 years, Liberty Communications has been providing technology and communications solutions to the communities it serves. From introducing two-party service phone lines in town in 1920, to the option of gigabyte internet in rural areas today, Liberty Communications has been committed to providing the newest in technology. About NTCA–The Rural Broadband Association

NTCA–The Rural Broadband Association is the premier association representing nearly 850 independent, community-based telecommunications companies that are leading innovation in rural and small-town America. NTCA advocates on behalf of its members in the legislative and regulatory arenas, and it provides training and development; publications and industry events; and an array of employee benefit programs. In an era of transformative technological advancements, regulatory challenges and marketplace competition, NTCA members are leading the technological evolution for rural consumers, delivering robust and high-quality services over future-proof networks that make rural communities vibrant places in which to live and do business. Because of their efforts, rural America is fertile ground for innovation in economic development, e-commerce, health care, agriculture, and education and contributes billions of dollars to the U.S. economy each year.
