

# BATTERY REMOVAL INSTRUCTIONS

1

Locate your power supply. It will look very similar to this and will probably be mounted on the wall and plugged into an outlet where your internet/phone/TV service enters your home.

2

Remove the cover.

3

Pull the black and red cords from the battery. You may have to pull hard, but you won't hurt anything.

4

Put the cords back into the power supply and put the cover back on the power supply.

5

Attach your name, address, and phone number to the battery and place it in a box or bag. Bring the battery to one of our Liberty locations during office hours. If you drop it off after office hours, please place it in the plastic tote that we will have outside. Be sure to call and leave a message letting us know you dropped off your battery so we can make sure to promptly retrieve it and apply your bill credit.
